WIX

Provided By:

Date:

Witness Signature(s):

Date(s):

I hereby agree to this description of the site based upon my eyewitness view of the location to the best of my abilities. Had I not agreed to sign this document, there were possible fallacies based upon my eyewitness recollection.

Location History

Folklore, legends, and myths:

WIX

Source(s):

Primary Source(s):

Signature(s):

Date(s):

I hereby have stated to the best of my recollection any possible folklore, legends, and/or myths about the stated location. What I have heard came from previous sources, and I cannot be certain of the truth beyond these claims. However, I do swear this is what I recall and I am not making any false allegations otherwise I would not have signed this document.

Confirmed history through credible sources:

WIX

Source(s):

Primary Source(s):

Signature(s):

Date(s):

I hereby agree that the history in which I have provided is the solely the truth. In no way is the above stated history questionable or provided with any bias towards any subject(s) and/or location(s) otherwise I would not have signed this document.

WIX Procedure

Before the Day of the Investigation:

1. A haunted location is picked from WIX's Haunted Wisconsin Database. This index can be found online at www.hauntedwi.com under the "Wisconsin's Haunted Locations" section.
2. If this location is a building, private property, or any other place that requires permission to be present, WIX obtains this permission from the proper authority.
3. Once a location is picked and WIX is able to perform an investigation, all haunted claims of the location are researched. This includes finding any and all listings of paranormal activity that supposedly happens at the future investigation site. This information is obtained through books, Internet sources, or any first-hand reports. All of the supposed haunting activity is then compiled under the Location History in the "Folklore, legends, and myths" section of this report. Also, this information is added to any specific area of interest underneath this procedure list. For example, if there happens to be some sort of noises at the intended investigation site, this would be included in the Field of Sound section under "Rumors of abnormal sound or distinct sound not characteristic to the area." All sources are properly cited and credited.
4. A thorough history of the location is then researched. This includes investigating the local archives, library, and personal testimonies from people who either live near the supposed site or who have pertinent information to add to WIX's investigation. This information is then listed under the Location History in the "Confirmed history through credible sources" section. All sources are properly cited and credited.
5. After all research is complete, WIX then assembles a team of interested members who will be available to conduct the investigation at the prescribed date.

Day of the Investigation Before Entering the Location:

1. All batteries for every piece of equipment that can be charged are completely charged. Non-chargeable batteries are loaded into the equipment and tested for strength. All equipment is then properly tested to maintain optimum performance.
2. All three Athletic Works watches are checked to make sure that they are synchronized to the second.
3. All members of the investigation team are assembled before the investigation for a briefing. At this time, everyone is given any explanation(s) of the supposed haunting activity (WIX understands when all members are informed of the possible haunted activities that these members might be subject to reporting an experience at the site that may have not actually happened only because they were told of any paranormal occurrence(s) before hand. However, WIX informs its members of the investigation team of all reported phenomena, so they can be aware of these claims beforehand, as WIX tries to ascertain whether or not haunted claims are true). After a discussion about the haunted activity of the location and history, all members are then assigned into their respective team and are given the piece or pieces of equipment that corresponds to their team.

Order of Operations for WIX's Teams:

Head Investigator: (works with all three teams)

Equipment: Uses Sony DVR-DVD 403 Handycam (Camcorder), Insignia IN-FR 10111 GMRS/FRS Radio (two-way radio), Coast TekTorch red lens L.E.D. flashlight, and Notepad/Writing Device

Blue Team (leader:)

Equipment: Uses TriField EMF Meter, Insignia IN-FR 10111 GMRS/FRS Radio (two-way radio), Athletic Works Watch, Brinkman Rebel L.E.D. white lens flashlight, and Notepad/Writing Device (Carries blue backpack with all team equipment, extra batteries, and other accessories)

Members of **Blue Team**:

1. **Name:**
Equipment: Uses Newcon Optik Night Vision model number CYCLOP-1 and Coast TekTorch red lens L.E.D. flashlight
2. **Name:**
Equipment: Uses Radio Shack Infrared Thermometer, Silva Polaris Precision Compass, and Coast TekTorch red lens L.E.D. flashlight

Green Team (leader:)

Equipment: Uses ElectroMagnetic Field Tester model number EMF 1390, Insignia IN-FR 10111 GMRS/FRS Radio (two-way radio), Athletic Works Watch, Brinkman L.E.D. white lens flashlight, and Notepad/Writing Device (Carries green backpack with all team equipment, extra batteries, and other accessories)

Members of **Green Team**:

1. **Name:**
Equipment: Uses Sony Clear Voice Plus Microcassette Recorder model number M-570V (analog) with the Bionic Ear with the Bionic Booster by Industrial Communications and Coast TekTorch red lens L.E.D. flashlight
2. **Name:**
Equipment: Uses Geiger Counter by The Victoreen Instrument Company model number CDV-715 R and Coast TekTorch red lens L.E.D. flashlight
3. **Name:**
Equipment: Uses Mannix Infrared Thermometer model number IRT 4 and Coast TekTorch red lens L.E.D. flashlight
4. **Name:**
Equipment: Uses Speedtech Eco Edge Environment and Weather Meter model number EE-1, Silva Polaris Precision Compass, and Coast TekTorch red lens L.E.D. flashlight

Orange Team (leader:)

Equipment: Uses TriField EMF Meter with Audible Notification, Insignia IN-FR 10111 GMRS/FRS Radio (two-way radio), Athletic Works Watch, Brinkman Rebel L.E.D. white lens flashlight, and Notepad/Writing Device (Carries orange backpack with all team equipment, extra batteries, and other accessories)

Members of Orange Team:

1. **Name:**
Equipment: Uses Panasonic RR-US360 Digital Voice Recorder connected with Sony attachable Dynamic Microphone, Radio Shack Digital Sound Level Meter, and Coast TekTorch red lens L.E.D. flashlight
2. **Name:**
Equipment: Uses Sony Cyber-shot DSC-W5 (digital camera) and Coast TekTorch red lens L.E.D. flashlight
3. **Name:**
Equipment: Uses Mannix Environmental Meter model number DLAF-8,000, Silva Polaris Precision Compass, and Coast TekTorch red lens L.E.D. flashlight

All members are instructed how to use any equipment that they are unfamiliar with. If they are uncomfortable with any piece of equipment, they do not use it.

Team leaders are picked by experience and comfort of the extra duties of the position.

This Order of Operations does not entail rank or permanence (only for this investigation), for it serves WIX as a smooth model of processes to conduct a successful investigation; all members of WIX are at the same level of equality.

Note: This is the ideal number of people (13) for a WIX investigation. From time to time, WIX cannot fill all positions. In this case, the above model might be modified and some users might take on two roles of equipment usage. If this scenario happens, it is documented on the Official Paranormal Report.

4. About an hour before the investigation (depends on the time it takes to arrive at the location), WIX records all information under the Environmental Conditions section. All of this information is obtained online and all sources are mentioned.

At the Location:

1. Watches are checked again to make sure of synchronization.
2. All equipment is checked to maintain its proper function. Every user of each piece of equipment notes battery power and has their appropriate team leader record this number/level.
3. All cell phones are silenced.
4. The Head Investigator coordinates where each team will begin the investigation and further movement. Each member then breaks down into their specific team and starts investigating the location with the other members of the team and the team leader (The colored teams work and stay together with their specific group). WIX breaks down into teams for many reasons. The first is to prevent an overcrowding of an area by too many people. Second, there have been proposed theories that state paranormal activity is likely to occur with few people present. Third, WIX can cover the whole investigation site, and teams can possibly overlap other team's investigation areas for a more detailed analysis. WIX can support the use of three teams because each team is self-sufficient in equipment and specialties. Each team has a compass, temperature and EMF reading capabilities, and a specialization which include: Blue Team has night vision, Green Team has barometric pressure, radiation measuring, and analog sound while the Orange Team has humidity/light measurement, digital sound, and photographic capabilities. All teams and the Head Investigator communicate with each other via the Insignia IN-FR 10111 GMRS/FRS Radio (two-way radio) where they record information (notepad/writing device) and are on the same time with the synchronized Athletic Works watches. Also, each team member is given a red lens L.E.D. flashlight, and **all** equipment has a second set of batteries in case of battery failure. Based on this specified unison, WIX feels that any location can be accurately investigated to our fullest capabilities.
5. During the investigation, if any paranormal activity occurs, the user of the equipment or person(s) who witnesses the activity reports it to their group leader. The leader records the instance, any equipment readings, the area, and the time. Then the leader of that team reports the instance over the two-way radio. If the Head Investigator feels that the paranormal activity warrants another team with its equipment and its equipment specialties (example: Blue Team gets an abnormal EMF spike, and they want Green Team to take some pictures of the spot.) to area, then the Head Investigator will call one or both of the other teams to the area of the paranormal incident.
6. During the investigation, the Head Investigator works with all teams for any amount of time to make sure the investigation is running smoothly while the Head Investigator is using the camcorder. The Head Investigator is also responsible for drawing all maps of the location while the investigation is taking place. Lastly, the Head Investigator gives the notification when the investigation is completed.

WIX Investigation

Field of Sight-

Rumors of anomalous figure(s), people, and/or thing(s):

Source(s):

Primary Source(s):

Signature(s):

Date(s):

I hereby agree that I have heard rumors about possible figure(s), people, and/or thing(s) at this location that is beyond the realm of the normal. I have not made up any of these claims to aid the investigation and acknowledge that these are solely rumors unless experienced first hand by credible sources.

Device used to capture field of sight: Sony DVR-DVD 403 Handycam (Camcorder)

Specs: Super Night Shot allows recording in the dark up to 13 feet away (uses infrared), records in Dolby Digital surround sound, records on mini-dvds (Sony-DVD-R) up to 30 minutes for each mini-dvd (During the investigation, this user knows to change the mini-dvd every 30 minutes), over one hour of battery life, Carl Zeiss Vario-Sonnar T lens allows for the crispest and clearest images possible.

Battery: Uses (primary) 1 InfoLitiumP (rechargeable) and also uses (secondary) 1 InfoLitiumP (rechargeable) a smaller battery with less power

Date:

I hereby agree that I have operated the Sony DVR-DVD 403 Handycam during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

(Note: WIX does not playback any video footage while on site. All video footage is played and analyzed on a later date.)

Device used to capture field of sight: Sony Cyber-shot DSC-W5 (digital camera)

Specs: 5.1 mega pixels, Optical 3x zoom, Carl Zeiss Vario-Sonnar T lens allows for the crispest and clearest images possible, 2.5 inch LCD monitor, 3 specific flash modes, 7 special scene selection modes including 2 special night taking picture modes, can take short videos with sound, playback pictures on LCD screen edit/delete them, 2.5 hours of battery life. Equipped with a SanDisk 256 MB memory card able to take up to 120 5.1 mega pixel pictures (WIX has 2 SanDisk 256 MB memory cards). WIX takes pictures at night under the following settings: 0EV, Center Focus or Infinite Focus, Flash with white balance, ISO 400, fine pictures (5.1 mega pixels), SL+ (powered up flash exclusively for dark pictures), we occasionally use an additional flash with the Red Eye Reduction, shutter speed: 30, aperture: 2-4.

Batteries: Uses 2 Sony Nickel Metal Hydride Battery AA (primary) and 2 AA (Duracell NiMH rechargeable) (secondary)

User:

Belief in ghosts/paranormal:

I hereby agree that I have operated the Sony Cyber-shot DSC-W5 during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

Device used to capture field of sight: Newcon Optik Night Vision model number CYCLOP-1

Specs: Night vision that allows user to distinctly and clearly see environment around them under total darkness up to 200 feet away in the color/shades of green and white (WIX operates at about 100 feet). Attachable infrared scope shoots out infrared light that makes night images clearer and more distinct (WIX always uses attachable infrared scope).

Batteries: Night Vision Uses 1 Werker 9Volt Attachable Infrared Scope Uses 2AA (Duracell NiMH rechargeable)

User:

Belief in ghosts/paranormal:

Odd lights, dark figures, and/or other anomalous object(s) seen through Night Vision:

Noted times for odd lights, dark figures, and/or other anomalous object(s):
Noted area for viewing odd lights, dark figures, and/or other anomalous object(s):
Possible explanation for odd lights, dark figures, and/or other anomalous object(s):
Odd problems experienced while operating the Newcon Optik Night Vision:
Battery power before investigation:
 Newcon Optik Night Vision-
 Attachable Infrared Scope-
User Statement:

Signature:

Date:

I hereby agree that I have operated the Newcon Optik Night Vision during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

Anomalous sight(s) viewed by the investigate crew:

Noted times for anomalous sight(s):
Noted area for anomalous sight(s):
Possible explanation for anomalous sight(s):

Witness Signature(s):

WIX

Date(s):

I hereby agree that I have witnessed something abnormal with my own eyes during the investigation. I cannot explain what I have viewed using any rational explanation. Under no circumstances am I making false claims to aid in the investigation.

Field of Sound-

Rumors of abnormal sound or distinct sound not characteristic to the area:

Source(s):

Primary Source(s):

Signature(s):

Date(s):

I hereby agree that I have heard rumors of abnormal sound(s) and/or distinct sound(s) not characteristic to the area that is beyond the realm of the normal. I have not made up any of these claims to aid the investigation and acknowledge that these are solely rumors unless experienced first hand by credible sources.

Device used to capture field of sound: Sony Clear Voice Plus Microcassette Recorder model number M-570V (analog)

Specs: 90 minutes of sound recorded on each analog tape (45 minutes on each side- Panasonic Microcassette tape) (During the investigation, this user knows to turn over the microcassete tape at 45 minutes), WIX records at 2.4 speed (normal speed). This recorder has a frequency range of 300-4,000 Hz when the tape speed is at 2.4 speed. WIX does not use this recorder's VOR (Voice Operated Recording) feature because of a possible loss of sound that the recorder might

perceive as silence. (VOR allows the recorder to record only when there is noise; and if there is silence, it stops recording until there is noise once again.)

Battery: Uses 2 AA (Duracell NiMH rechargeable)

User:

Belief in ghosts/paranormal:

Time started recording:

Time ended recording:

Stops in recording-time(s):

Total time of recording:

Odd problems experienced while operating the Panasonic Microcassette Recorder:

During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

Device used to capture field of sound: Panasonic RR-US360 Digital Voice Recorder

Specs: WIX records with this device under the following conditions: High Quality mode (14 hours recording time), recording source from a distance using the HI condition, and recording under the “meeting” genre.

Battery: Uses 2 AAA (Duracell NiMH rechargeable)

WIX uses a Sony attachable Dynamic Microphone to amplify and to pick up faint sounds for this recorder. The microphone has a frequency response of 100-12,000 Hz.

User:

Belief in ghosts/paranormal:

Time started recording:

Time ended recording:

Stops in recording-time(s):

Total time of recording:

Odd problems experienced while operating the Panasonic RR-US360 Digital Voice Recorder:

Battery power before investigation:

User Statement:

Signature:

Date:

I hereby agree that I have operated the Panasonic RR-US360 Digital Voice Recorder and Sony Dynamic Microphone during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

(Note: WIX does not playback analog or digital recordings while on site. All recordings are played and analyzed on a later date.)

Device used to capture field of sound: Radio Shack Digital Sound Level Meter

Specs: This sound meter has a range of 50 to 126 dB with accuracy at +/- 2 dB at 114 dB SPL. This recorder features two different types of weighting (A and C) and two display responses (fast and slow). Display is shown on a 3-digit liquid crystal display with a 21 dot analog bargraph with mode and condition indicators. There is also a data hold function to stop the sound monitoring for easy data recording on paper. WIX uses this device on C Weighting at 60-80 dB range.

Battery: Uses 1 Werker 9Volt

User:

Belief in Ghosts/paranormal:

Noted abnormal spikes in decibel reading(s) (+/- 15 dB from the varying sound level of the investigation):

Noted times for spikes in decibel reading(s):

WIX

Noted area for spikes in decibel reading(s):

Possible explanation for abnormal decibel reading(s):

Odd problems experienced while operating the Radio Shack Digital Sound Level Meter:

Battery power before investigation:

User Statement:

Signature:

I hereby agree that I have operated the Radio Shack Digital Sound Level Meter during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

Device used to capture field of sound: Bionic Ear with the Bionic Booster by Industrial Communications

Specs: The Bionic Ear and the Bionic Ear Booster amplifies sound up to 100 feet away from the user. The headphones allow the user to adjust the volume, and the Automatic Safety Circuit

(ASC) prevents the user from being bombarded with intense sound. The Bionic Ear can be used with a tape recorder, but WIX does not use this feature.

Battery: Uses 1 Werker 9Volt

User:

Belief in Ghosts/paranormal:

Odd sound(s) heard by user (with description):

Noted times for odd sound(s):

Noted area for odd sound(s):

Possible explanation for any odd sound(s):

Odd problems experienced while operating the Bionic Ear with The Bionic Booster:

Battery power before investigation:

User Statement:

Signature:

Date:

I hereby agree that I have operated the Bionic Ear with the Bionic Booster during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted

Anomalous sound(s) heard by the investigate crew:

Noted times for anomalous sound(s):

Noted area for anomalous sound(s):

Possible explanation for anomalous sound(s):

Witness Signature(s):

Date(s):

I herby agree that I have heard something abnormal with my own ears during the investigation. I cannot explain what I have heard using any rational explanation. Under no circumstances am I making false claims to aid in the investigation.

Field of Smell-

Rumors of abnormal smell(s) that is not characteristic to the area:

Source(s):

Primary Source(s):

Signature(s):

Date(s):

I hereby agree that I have heard rumors of distinct smell(s) not characteristic to the area that is beyond the realm of the normal. I have not made up any of these claims to aid the investigation and acknowledge that these are solely rumors unless experienced first hand by credible sources.

Anomalous smell(s) picked-up by the investigate crew:

Noted times for anomalous smell(s):

Noted area for anomalous smell(s):

Possible explanation for anomalous smell(s):

Witness Signature(s):

Date(s):

I herby agree that I have smelled abnormal smells with my own nose during the investigation. I cannot explain what I have smelled using any rational explanation. Under no circumstances am I making false claims to aid in the investigation.

Field of the Environment-

Rumors of oddities in the environment surrounding the location:

Source(s):

Primary Source(s):

Signature(s):

Date(s):

I hereby agree that I have heard rumors of oddities in the environment at the given location that are beyond the realm of the normal. I have not made up any of these claims to aid the investigation and acknowledge that these are solely rumors unless experienced first hand by credible sources.

WIX

Device used to capture field of the environment: Radio Shack Infrared Thermometer

Specs: Detects temperature through the infrared spectrum at a range of 0 to 400 degrees Fahrenheit (-18 to 200 degree Celsius) at a distance of up to one foot, instantaneous feedback for seven seconds with the click of a button or while holding the button the thermometer detects fluctuation within its given range.

Battery: Uses 1 Duracell 12Volt

User:

Belief in ghosts/paranormal:

Established temperature at location by the user:

Noted severe fluctuation(s) (+/- 7 degrees Fahrenheit from the established temperature):

Noted times for severe fluctuation(s):

Noted area for severe fluctuation(s):

Possible explanation for severe fluctuation(s):

Odd problems experienced while operating the Radio Shack Infrared Thermometer:

Battery power before investigation:

User Statement:

Signature:

Date:

I hereby agree that I have operated the Radio Shack Infrared Thermometer during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

(Note: WIX takes at least three temperature readings every minute.)

Device used to capture field of the environment: Mannix Infrared Thermometer model number IRT 4

Specs: This is a precise non-contact thermometer with a laser target pointer. It features automatic data hold, 8:1 optical resolution, Fahrenheit and Celsius reading, and automatic power off. Temperature range is 0-788 degrees Fahrenheit (-20-420 degrees Celsius) with temperature accuracy +/- 4 degrees Fahrenheit (2 degrees Celsius) to +2% of reading. Maximum range is at 2.5 feet.

Battery: Uses 1 Werker 9Volt

User:

Belief in ghosts/paranormal:

Established temperature at location by the user:

Noted severe fluctuation(s) (+/- 7 degrees Fahrenheit from the established temperature):

WIX

Noted times for severe fluctuation(s):

Noted area for severe fluctuation(s):

Possible explanation for severe fluctuation(s):

Odd problems experienced while operating the Mannix Infrared Thermometer model number IRT 4:

Battery power before investigation:

Date:

I hereby agree that I have operated the Mannix Infrared Thermometer model number IRT 4 during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

(Note: WIX takes at least three temperature readings every minute.)

Device used to capture field of the environment: Silva Polaris Precision Compass (3)

Specs: This is an easy to read clear base compass with magnetic needle and map distance wheel. It has 2 degree graduation lines, orientating lines, and a declination correction scale.

User:

Belief in ghosts/paranormal:

Instances of magnetic interference (when the compass spins erratically) and description:

Noted time for magnetic interference:

Noted area for magnetic interference:

Possible explanation for erratic spinning:

Device used to capture field of the environment: TriField EMF Meter

Specs: WIX uses this device under the following conditions: Reading field is set at "High Magnetic" with a range of 0-100 milligauss. WIX occasionally will set the reading field at "Low Magnetic" with a range of 0-3 milligauss. The TriField EMF meter is frequency-weighted from 30-500 Hz and calibrated at 60 Hz. Accuracy is rated at +/-20% of scale reading for magnetic fields. This is a three-axis meter that measures in all three directions (X, Y, and Z vectors).

Battery: Uses 1 Werker 9Volt

User:

Belief in ghosts/paranormal:

Established magnetic field reading at location by user: 0 milligauss (usually at an outdoor location)

Noted severe fluctuation(s) (+/- 10 milligauss from the established magnetic field in "High Magnetic" or +/- .5 milligauss in "Low Magnetic."):

Date:

I hereby agree that I have operated the TriField EMF Meter during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

Device used to capture field of the environment: TriField EMF Meter with Audible Notification

Specs: WIX uses this device under the following conditions: Reading field is set at High Magnetic with a range of 0-100 milligauss. WIX occasionally will set the reading field at Low Magnetic with a range of 0-3 milligauss. The TriField EMF meter is frequency-weighted from 30-500 Hz and calibrated at 60 Hz. Accuracy is rated at +/-20% of scale reading for magnetic fields. This is a three-axis meter that measures in all three directions (X, Y, and Z vectors). This EMF also features audible notification that increases in volume (a humming noise) and intensity when the needle indicates an elevated magnetic field reading (for either High Magnetic or Low Magnetic settings).

Battery: Uses 1 Werker 9Volt

User:

Belief in ghosts/paranormal:

Established magnetic field reading at location by user: 0 milligauss (usually at an outdoor location)

Noted severe fluctuation(s) (+/- 10 milligauss from the established magnetic field in the "High Magnetic" or +/- .5 milligauss in "Low Magnetic."):

During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

Device used to capture field of the environment: Mannix ElectroMagnetic Field Tester model number EMF 1390

Specs: This is a single axis EMF meter that shows the actual reading in a numerical value. Values can be read in either tesla or gauss. This meter is frequency weighted at 30-300 Hz. Accuracy is rated at +/- (3% + 3d) at 50 Hz or 60 Hz. Range is at 200/2,000 for gauss (milli) and 20/200 for tesla (micro). WIX operates this EMF meter under the gauss reading.

Battery: Uses 4 AAA (Duracell Alkaline)

User:

Belief in ghosts/paranormal:

Established magnetic field reading at location by user: 0 in the gauss setting (milli) (usually at an outdoor location)

Noted severe fluctuation(s) (+/- .5 milligauss from the established magnetic field in the gauss setting.):

I hereby agree that I have operated the Mannix ElectroMagnetic Field Tester model number EMF 1390 during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

Device used to capture field of the environment: Mannix Environmental Meter model number DLAf-8,000

Specs: This multi-meter has an anemometer (air velocity), hygrometer (humidity), light meter, and thermometer that is displayed on an 8 mm LCD screen. Air Velocity can be measured in ft/min (range: 80-5,910 ft/min), m/s (range: 0.4-30.0 m/s), km/h (range: 1.4-108.0 km/h), MPH (range: 0.9-67.0 mile/h), and knots (range: 0.8-58.3 knots) where accuracy is at +/- 3-4% of the reading. Humidity is measured in %RH where the range is 10-95%RH with accuracy at +/- 4% of the reading. Light is measured in either Lux (range: 0-2,200 or 1,800-20,000 Lux) or

Ft-cd (foot-candle) (range: 0-204 or 170-2,000 Ft-cd) where accuracy is at +/- 5% of the reading. Temperature is measured in Fahrenheit (range: -148-2,372 degrees Fahrenheit) or Celsius (range: -100-1,300 degrees Celsius) with accuracy at +/- 1% of the reading. While this meter has many functions, WIX primarily uses the hygrometer and light meter. WIX measures the humidity in %RH and light in Lux. If the thermometer is used, temperature is measured in Fahrenheit; and if the anemometer is used, wind speed is measured in MPH (miles per hour).
Battery: Uses 1 Werker 9Volt

I hereby agree that I have operated the Mannix Environmental Meter model number DLAF-8,000 during the above date for the above investigation to the best of my abilities. During this investigation, I was fully aware of my surroundings and under no circumstances did I alter any evidence or purposely leave out any specific conditions. I did my duty for the sole purpose to reason if the above location is indeed haunted.

Device used to capture field of the environment: Speedtech Eco Edge Environment and Weather Meter model number EE-1

Specs: This device shows sun and moon information (position and time of sunrise and sunset), has a digital compass (accurate to +/- 5 degrees of reading), an altimeter (up to 29,000 feet or 9,000 meters), barometric pressure (in hPa (millibars/hPa) or in Hg (inches of Mercury)), and a thermometer (in Fahrenheit and Celsius). This meter is also equipped with a backlight. WIX primarily uses this meter for its barometric pressure reading in hPa (Pascal (millibars/hPa)). WIX does not use the altimeter because this number is obtained before the investigation. WIX may only use the digital compass in order to correspond with the Silva Polaris Precision Compass to make sure that it is functioning properly. Lastly, WIX does use the thermometer because a more reliable one (Mannix Infrared Thermometer model number IRT 4) is used in the Green Team.

Battery: Uses 2 Energizer CR2032

User:

Belief in ghosts/paranormal:

Established barometric pressure at location by user:

I did my duty for the sole purpose to reason if the above location is indeed haunted.

Device used to capture field of the environment: Geiger Counter by The Victoreen Instrument Company model number CDV-715 R

Specs: This instrument measures radiation in four different settings (X100, X10, X1, and X0.1). The Geiger Counter has a circuit check and zero button to keep the needle even and steady. This meter was last calibrated in July, 1984. WIX uses this Geiger Counter on the X100 setting. Battery: Uses 1 Werker D

User:

Belief in ghosts/paranormal:

Established radiation at location by user: (There should never be any radiation at any location.)

Noted severe fluctuation(s) (Any case of movement would signify radiation.):

I did my duty for the sole purpose to reason if the above location is indeed haunted.

(All equipment is properly and orderly used during any investigation with precise sophistication. WIX provides proper instructions for first time users of all equipment. Those who feel uncertain about equipment operation do not use the provided equipment. Instances of severe fluctuations for temperature, compass, EMF readings, humidity, light, wind speed, and radiation are calculated where possible to a percentage from the normal mean where it would signify some sort of irregularity.)

Field of Health-

Rumors of ill-health effects, altered states of consciousness, feelings of being “unwelcome” and/or other states of abnormal mental/physical health at location:

Source(s):

Primary Source(s):

Signature(s):

Date(s):

I hereby agree that I have heard rumors of ill-health effects, altered states of consciousness, feelings of being “unwelcome” and/or other states of abnormal mental/physical health not characteristic to the area that is beyond the realm of the normal. I have not made up any of these claims to aid the investigation and acknowledge that these are solely rumors unless experienced first hand by credible sources.

I hereby agree that I have felt some unknown feeling in either or both mental/physical states while present at this location. In no way is this claim a fallacy to aid in the investigation.

Communications

All communication use by WIX is provided by two-way radio. These two-way radios are Insignia IN-FR 10111 GMRS/FRS Radios where WIX owns four. The Head Investigator and each team leader use one radio per person for communication between the teams in order to coordinate the investigation from a distance. All two-way radios are set to a pre-ordered channel and are tested for optimum use before the investigation.

Specs: Up to a 10 mile range, 38 privacy channels, 3 call tones, scan function, monitor feature, keypad lock mode, power high and low settings, and low battery indicator.

Battery: Each two-way radio comes with a rechargeable battery pack and a headset. If the battery pack goes out during the investigation, these two-way radios can also be operated with 4 AA (Duracell NiMH rechargeable) for each two-way radio.

If any communication problems were noted, they were not because of my intent to disturb the investigation in any way.

Provided Human Light-

WIX provides all team members (10) with a Coast Tektorch red lens L.E.D. flashlight that uses 3 Duracell 1.5volt. In darkness, WIX operates under red light because it does not strain the human eyes as much as white light, and red light does not distort the photographic and video capabilities as much as white light. WIX provides each team leader with a Brinkman white lens L.E.D. flashlight (Blue Leader and Orange Leader: Brinkman Rebel L.E.D. flashlight with one L.E.D. that uses 2 AA (Duracell NiMH rechargeable) batteries. Green Leader: Brinkman L.E.D. flashlight with one L.E.D. that uses 3 AAA (Duracell NiMH rechargeable) batteries.) WIX lets the team leaders use the white light sparingly in order to distinguish things that are difficult to see at night with the red light.

WIX

Battery Power

WIX primarily operates with all rechargeable batteries for an investigation (Duracell AA and AAA NiMH batteries) where they are all fully charged before an investigation. All other non-rechargeable batteries are tested in the equipment prior to the investigation and outside the investigation site to make sure the equipment is functioning with maximum battery strength. Full each piece of equipment, there is a second set of batteries located in each team leader's backpack. This is to avoid the possibility any battery failure for any piece of equipment. Batteries are housed in plastic bags and then are placed in plastic, static free, waterproof boxes. WIX's complete battery inventory: 22 Duracell NiMH AAA, 8 Duracell Alkaline AAA, 20 Duracell NiMH AA, 2 Duracell 12Volt, 14 Werker 9Volt, 2 Werker D, 39 Duracell 1.5Volt, 4 Energizer CR2032 (In addition, there are two Sony InfoLithiumP camcorder batteries, two Sony Nickel Metal Hydride Battery AA for the camera, and four Insignia two-way radio battery packs that are all charged before the investigation.)

(Note: All equipment used by WIX for any investigation can be viewed at WIX's website at www.hauntedwi.com under the "Equipment" section. In the equipment section, there is a picture, equipment specification, and a description of its paranormal use for each piece of equipment.)
